

CHANGE OF ONLINE SERVICES AT VERITAS HEALTH CENTRE

To improve patient care, our Practice is moving from **EMIS Web** to the more reliable **SystemOne** system, already used by many GP Practices, hospitals, and NHS services. This change will help us provide faster, smoother, and more connected care.

As part of this move, our **online services will also change**. EMIS Online will transition to **SystemOnline**, which means that access to medical records, ordering prescriptions, and booking appointments will be **unavailable from 4th – 15th September**, and will resume on **16th September**. This change will also impact access to the NHSApp

Patients will need to **re-register for SystemOnline** and the **NHS App** (if already registered). This requires requesting access and providing ID to confirm identity. We encourage patients to register for the NHSApp due to ease of access.

To support this process, we will provide helpful information and **drop-in sessions** in the coming weeks to assist anyone who needs help with registration.
